PROFILE

Engineering leader with almost two decades of experience building software, leading teams and scaling technology platforms across banking, retail and financial services. Leads payments, digital wallet and loyalty engineering at Landmark Group, combining hands-on technical depth with organisational leadership across large engineering teams and business-critical systems.

EXPERIENCE

Oct 2025 – Present **Head of Engineering, Payments - Retail & Ecommerce**

[Landmark Group](#)

Lead engineering for payments, digital wallet, and loyalty platforms across 8 online and offline retail brands operating in 7 countries. Responsible for platform strategy, architecture and delivery across a ~40-engineer organisation supporting millions of customers and billions in annual transaction volume.

Payments · Digital Wallets · Loyalty · Platform Engineering · AI Enablement

Nov 2022 – Oct 2025 **Head of Technology - Retail**

[Landmark Group](#)

Led retail technology across ~600 stores in 7 countries, spanning point-of-sale, omni-channel commerce and the platform modernisation programmes underneath. Established the Engineering Excellence programme across a ~300-engineer organisation, defining standards, career frameworks and engineering governance.

Point-of-Sale · Omni-Channel · Platform Modernisation · Engineering Excellence · Technology Leadership

Aug 2022 – Nov 2022 **Vice President, Software Engineering - CIB**

[JPMorgan Chase](#)

Returned to JPMorgan Chase to help build Capital Connect, the firm's digital private markets platform. Contributed to front-end architecture and platform capabilities using TypeScript and GraphQL within a strategic investment banking initiative.

Digital Private Markets · Platform Architecture · TypeScript · GraphQL · Investment Banking

Nov 2021 – Aug 2022 **Head of Software Development - Retail**

[Tesco Plc](#)

Led ~50 engineers modernising Tesco's in-store checkout platform across more than ~3,000 stores. Delivered a cloud-native architecture built on Remix, TypeScript, GraphQL and Kubernetes, improving deployment flexibility for one of the UK's largest retail technology estates.

Point-of-Sale · Cloud Native · TypeScript · Kubernetes · Technology Leadership

May 2017 – Nov 2021

Vice President, Senior Technical Lead - CIB

[JPMorgan Chase](#)

Led engineering for a strategic desktop platform serving Sales, Research, Algorithmic Trading and Execution. Owned platform architecture and front-end strategy across 8 workstreams, directly managing ~16-engineers building a shared application ecosystem used globally.

Desktop Platforms · Platform Engineering · Developer Experience · React · TypeScript · Investment Banking

Nov 2016 – May 2017

Full-Stack Technical Lead - Media Streaming Services

[Piksel Group](#)

Led a cross-functional team delivering media streaming platforms built on Angular, Node.js and Go microservices. Responsible for architecture, engineering delivery and line management across a rapidly evolving product suite.

Media Streaming · Microservices · Angular · GoLang

Jul 2015 – Nov 2016

Systems Integrator - Sports Betting & Gaming

[William Hill Plc](#)

Built and integrated real-time transaction systems within William Hill's betting and gaming platforms. Worked across Java, Spring Boot and enterprise integration technologies where reliability, settlement accuracy and operational resilience were critical.

Sports Betting · Real-Time Transactions · Java · Spring · Enterprise Systems

Mar 2014 – Jul 2015

Senior Developer - Digital Agency

[Search Laboratory](#)

Delivered full-stack web applications across JavaScript, C# and emerging React ecosystems, with a strong focus on analytics, customer acquisition and data-driven product development.

Digital Products · JavaScript · MVC · C# · Analytics

Feb 2012 – Mar 2014

Software Engineer - Digital Agency

[Web Marketing Group](#)

Built and shipped client-facing web applications across JavaScript, PHP and .NET, developing the technical foundations that would shape the rest of my career.

JavaScript · PHP · .NET · SQL · SVN

2011 – 2012

Professional Chess

Full-time on the tournament circuit

Sept 2008 – Jan
2011

Finance Systems Developer - Retail

WM Morrisons Plc

Built finance and back-office systems using Oracle, Java and PL/SQL within one of the UK's largest retailers. Learned early that financial systems are remarkably unforgiving of mistakes, a lesson that proved useful throughout the rest of my career.
